
Introduction

The purpose of sampling is to develop decision rules to accept or reject product based on sample data. Poor sampling techniques can result in bias in measurement of the quality of product. Without knowing it, companies stand to lose millions per annum in lost sales revenue.

A better sampling methods and statistical analysis techniques can eliminate bias and improve precision.

This 1-day training concentrated especially on an ISO recognized & accepted sampling schemes for inspection. The course cover sampling plans indexed by acceptable quality level (AQL), criteria for switching rules (e.g. from normal to tightened inspection), skit-lot criteria and characteristics, etc. which are essential to equip all participants with the necessary knowledge for sampling.
